

Midterm 1 Reference Sheet

Algorithm 1 The Benjamini-Hochberg Procedure

input: FDR level α , set of n p-values P_1, \dots, P_n

Sort the p-values P_1, \dots, P_n in non-decreasing order $P_{(1)} \leq P_{(2)} \leq \dots \leq P_{(n)}$

Find $K = \max\{i \in \{1, \dots, n\} : P_{(i)} \leq \frac{\alpha}{n}i\}$

Reject the null hypotheses (declare discoveries) corresponding to $P_{(1)}, \dots, P_{(K)}$

Useful Distributions:

| Distribution | Support | PDF/PMF | Mean | Variance | Mode |
|--------------------------------------|----------------------|--|------------------------|--------------------------|---------------------------|
| $X \sim \text{Poisson}(\lambda)$ | $k = 0, 1, 2, \dots$ | $\frac{\lambda^k e^{-\lambda}}{k!}$ | λ | λ | $\lfloor \lambda \rfloor$ |
| $X \sim \text{Gamma}(\alpha, \beta)$ | $x \geq 0$ | $\frac{\beta^\alpha}{\Gamma(\alpha)} x^{\alpha-1} e^{-\beta x}$ | $\frac{\alpha}{\beta}$ | $\frac{\alpha}{\beta^2}$ | $\frac{\alpha-1}{\beta}$ |
| $X \sim \mathcal{N}(\mu, \sigma^2)$ | $x \in \mathbb{R}$ | $\frac{1}{\sigma\sqrt{2\pi}} \exp\left(-\frac{1}{2}\left(\frac{x-\mu}{\sigma}\right)^2\right)$ | μ | σ^2 | μ |
| $X \sim \text{Exponential}(\lambda)$ | $x \geq 0$ | $\lambda \exp(-\lambda x)$ | $\frac{1}{\lambda}$ | $\frac{1}{\lambda^2}$ | 0 |

Conjugate Priors: For observations $x_i, i = 1, \dots, n$:

| Likelihood | Prior | Posterior |
|--|--|---|
| $x_i \theta \sim \text{Bernoulli}(\theta)$ | $\theta \sim \text{Beta}(\alpha, \beta)$ | $\theta x_{1:n} \sim \text{Beta}(\alpha + \sum_i x_i, \beta + \sum_i (1 - x_i))$ |
| $x_i \mu \sim \mathcal{N}(\mu, \sigma^2)$ | $\mu \sim \mathcal{N}(\mu_0, 1)$ | $\mu x_{1:n} \sim \mathcal{N}\left(\frac{\sigma^2}{\sigma^2 + n} (\mu_0 + \frac{1}{\sigma^2} \sum_i x_i), \frac{\sigma^2}{\sigma^2 + n}\right)$ |
| $x_i \lambda \sim \text{Exponential}(\lambda)$ | $\lambda \sim \text{Gamma}(\alpha, \beta)$ | $\lambda x_{1:n} \sim \text{Gamma}(\alpha + n, \beta + \sum_i x_i)$ |

Generalized Linear Models

| Regression | Inverse link function | Likelihood |
|-------------------|-----------------------|-------------------|
| Linear | identity | Gaussian |
| Logistic | sigmoid | Bernoulli |
| Poisson | exponential | Poisson |
| Negative binomial | exponential | Negative binomial |

Sigmoid function: $\sigma(x) = \frac{1}{1 + e^{-x}}$
